ARISTO

Made in Austria

Products 2026

With heart and vision:
On to the next chapter!

After more than 65 years of successful brand history, ARISTO is beginning a new chapter. On July 1, 2025, Schneider Schreibgeräte GmbH acquired the trademark rights to ARISTO- a step that not only makes strategic sense, but is also an expression of a long-standing, trusting partnership. For decades, the ARISTO brand has stood for quality, precision, and reliability – values that we at Schneider also live by. That is why I am particularly pleased that we are now continuing this path together.

The sales activities of both brands will be bundled in Schneider Novus Vertriebs GmbH in the future – with the aim of continuing to support our customers with competence, commitment, and personal service.

Production will remain unchanged in Austria – the origin, quality, and identity of ARISTO will be preserved. At the same time, we want to further develop the brand's potential and provide new impetus.

I am convinced that with this new chapter, we will continue the success story of ARISTO – together, sustainably, and with an eye to the future.

Frank Groß
Managing Director, Schneider Schreibgeräte GmbH

Awarded for its **sustainability**

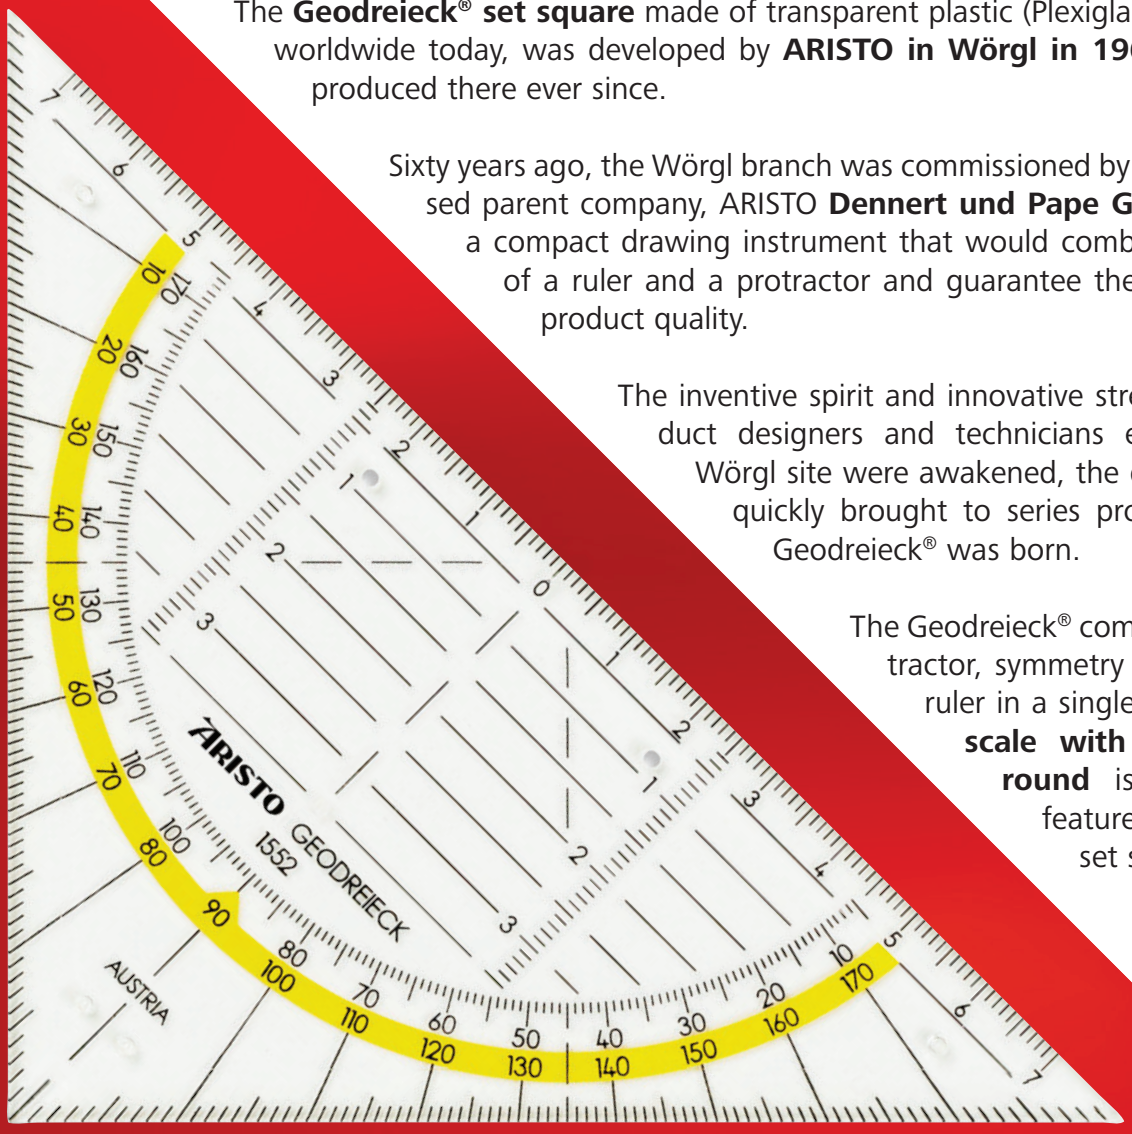

We focus on quality with a clear conscience: **54 of our products have already been awarded the Austrian Ecolabel - the official seal of quality for environmentally friendly and healthy products**.
This means that we not only guarantee the highest standards in terms of materials and workmanship, but also environmentally friendly production under fair conditions.

What does this mean to you? You receive products of tested quality that contain fewer harmful substances, are made from sustainable materials and have been manufactured under environmentally friendly conditions

By choosing these products, you are also contributing to a future worth living.
Good for the environment - good for all of us!

Award-winning products are marked in the catalog with the Austrian Ecolabel logo.

Almost everyone knows it, a lot of people use it - but who invented it?

The **Geodreieck® set square** made of transparent plastic (Plexiglas®), which is used worldwide today, was developed by **ARISTO in Wörgl in 1964** and has been produced there ever since.

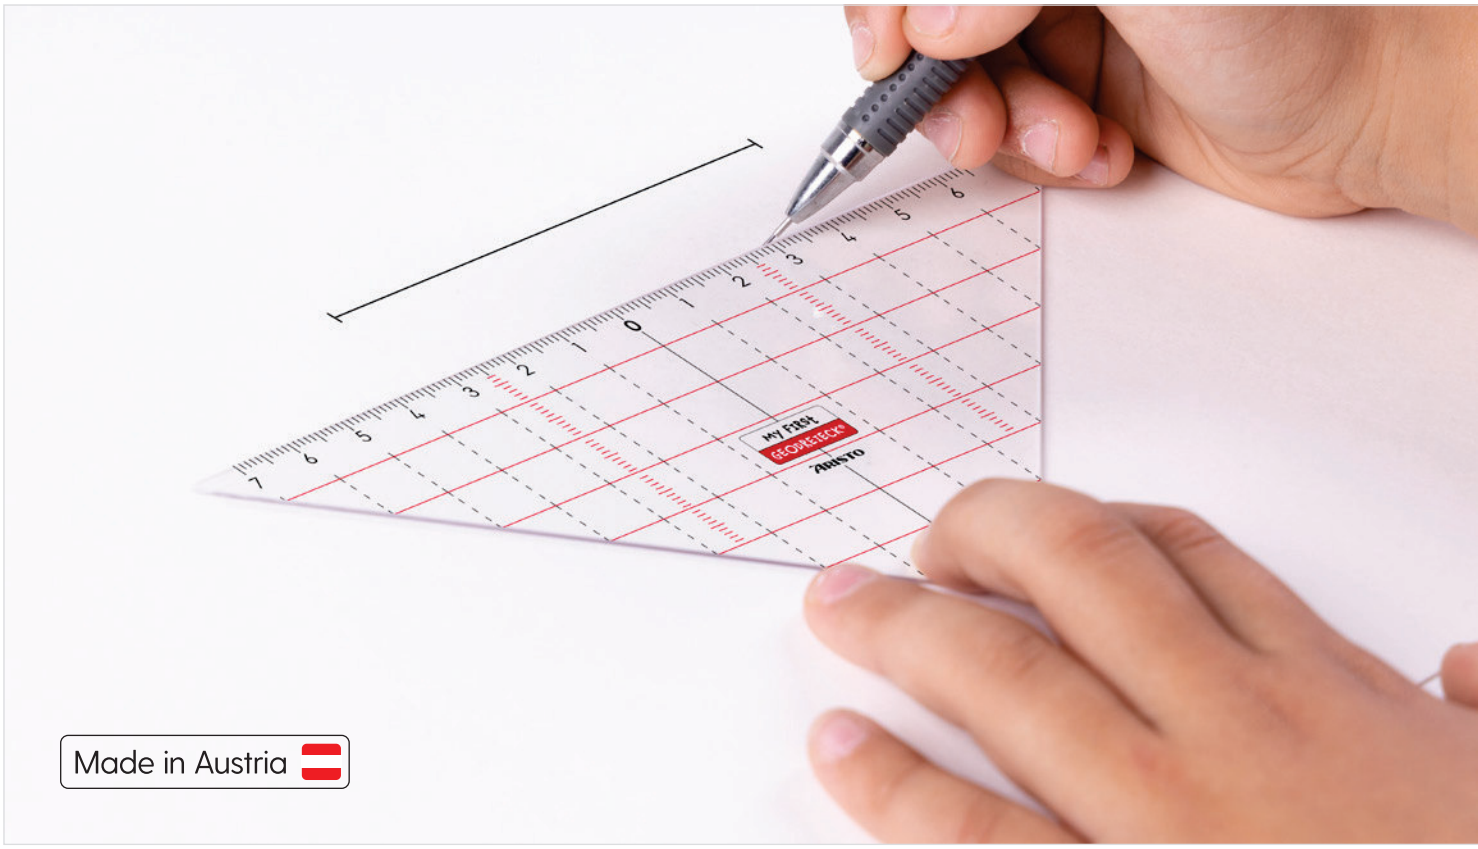

Sixty years ago, the Wörgl branch was commissioned by the Hamburg-based parent company, ARISTO **Dennert und Pape GmbH**, to develop a compact drawing instrument that would combine the functions of a ruler and a protractor and guarantee the highest possible product quality.

The inventive spirit and innovative strength of the product designers and technicians employed at the Wörgl site were awakened, the development was quickly brought to series production and the Geodreieck® was born.

The Geodreieck® combines a ruler, protractor, symmetry ruler and parallel ruler in a single tool. **The angle scale with yellow background** is a recognisable feature of the ARISTO set square family.

Since 1964:
Over 60 years of ARISTO Geodreieck®

The Story goes on:
My first Geodreieck®

As the „little brother/little sister" of the original ARISTO AR1552 set square, we have developed **My first Geodreieck®** especially for pupils from the **3rd grade onwards** and its functions fulfil exactly the requirements specified in the curricula, namely:

- Right angles
- Measuring straight line
- Parallels

The first experiences of using learning aids are particularly formative for the further development of a pupil and very often decide whether a subject is perceived with motivation and joy or fear.

For this reason, the other (angle) functions of the Geodreieck® AR1552 - have been deliberately omitted, making it much easier to enter the world of geometry and maths.

AR1551, My first Geodreieck®,16 cm NEW

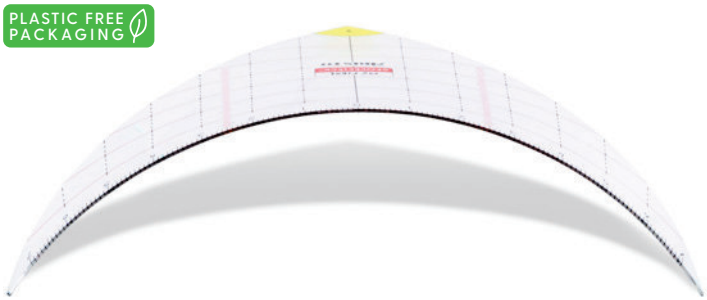

- Ideal for students from the 3rd grade onwards
- Functions: right angle, parallelism, and measuring straight lines
- Made of flexible 0.75 mm thick PET-G material
- Rounded corners
- Virtually unbreakable
- High scratch resistance
- FSC-certified cardboard packaging

Item No.	Bar Code	Hypotenuse
AR1551	9 003182 015511	16 cm

Made in Austria

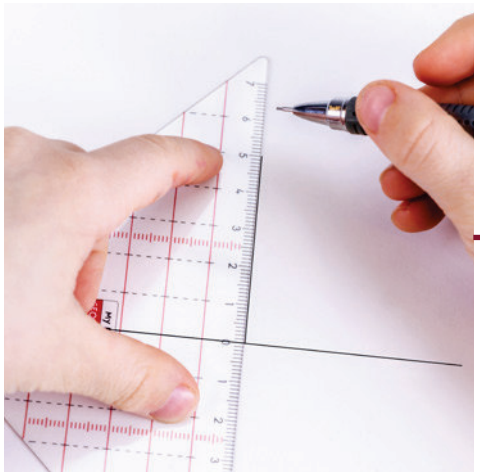

PLASTIC FREE PACKAGING

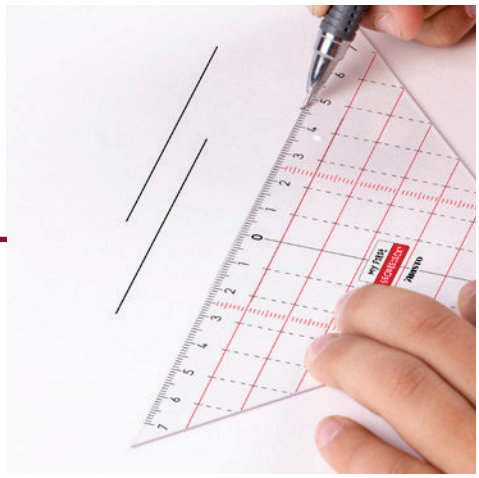

The Geodreieck® set square AR1551 is made of 0.75 mm thick PET-G. This material is characterized by its flexibility, making it almost unbreakable. Despite its flexibility, the dimensional accuracy is not affected.

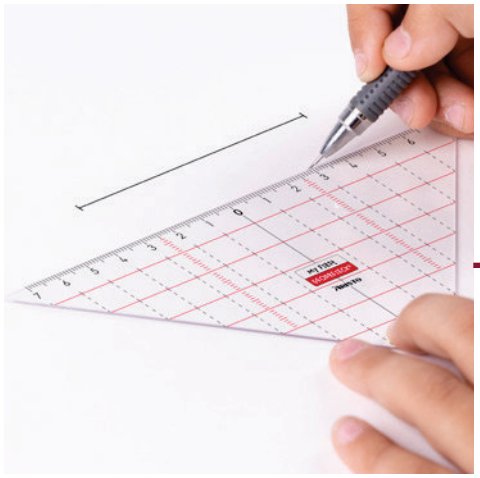

The surface is protected by a laminate. This prevents the print image from rubbing off and makes the triangle very easy to clean.

Right angle

Parallelism

Measuring straight lines

AR1552, Geodreieck® 16 cm

- Scale, protractor, symmetry scale and parallel ruler in one drawing instrument
- Made of highly transparent Plexiglas® in Austria

AR1550/4, TZ Set Square, 16 cm, extremely flexible, NEW

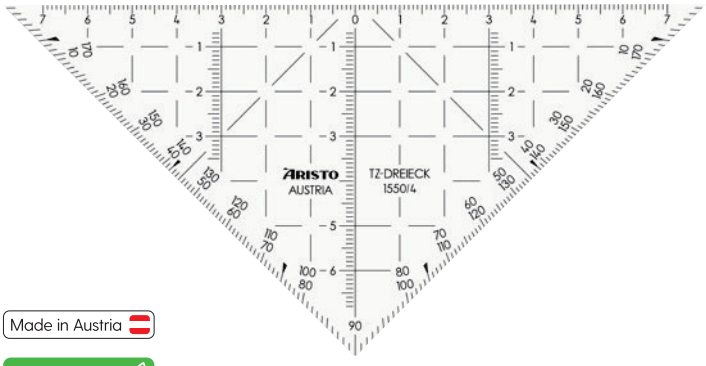

- 10mm grid, vertical millimetre graduations to the hypotenuse
- Angles marked 7° and 42° for perspective drawing, 75° for italic writing and 45° lines for easy hatching
- Especially suitable for creative applications
- made of flexible 0.75 mm thick PET-G
- Nearly unbreakable
- High accuracy to measurement
- Abrasion-proof deep embossing of graduation, lettering and angle scale with yellow background
- In accordance with the standards ÖNORM A2134 and ÖNORM A2131
- FSC-certified carton packaging

The TZ set square 1550/4 with a hypotenuse of 16 cm is especially suitable for creative applications such as bullet journaling, lettering, perspective drawing and sketching, in addition to its use in technical drawing.

Especially the handy format and the parallel function offer creative users a new practical tool.

The TZ set square 1550/4 is made of 0,75mm PET-G which is very flexible and hard to burst, nevertheless remaining accurate to measurement. Despite the flexibility, the dimensional accuracy is not affected.

Adjustable Set Square

The ARISTO adjustable set square with a leg of 20 cm and facets at all three edges for drawing of precise lines is made of crystal-clear Plexiglas®, 3.5mm thick. This dimensionally stable material guarantees the unique top quality.

One side of the isosceles set square is adjustable so that with a constant guide edge (0-line) the functionality of a square and a protractor can be combined.

The degree scales 0° to 45° and 90° to 45° (in 1/2° increments) are offset in white, continuously adjustable and fixable with a screw. A red mark enables exact adjustment.

- Made of 3.5 mm thick crystal-clear Plexiglas®
- Continuously adjustable angle from 0° to 90° (1/2° scale 0° to 45°)
- Facets for drawing of precise lines
- Constant guide edge

Cutting Ruler, Red Cutting Edge

ARISTO cutting rulers are made of crystal-clear acryl glass. This dimensionally stable material and the abrasion-proof deep embossing guarantee the unique top quality. At one side the rulers have a cutting edge marked red and at the other one a facet at the mm-scale for drawing of precise lines.

Additional scales suitable as symmetry scale (central 0-point) and as parallel ruler (5mm grid) are special features of the cutting rulers.

- Made of crystal-clear acryl glass, 3mm thick
- Also suitable as symmetry and parallel ruler
- Abrasion-proof deep embossing
- With mm-scale (300mm) and facet
- Cutting edge marked red
- Packaged in a cardboard sleeve

Drawing Boards by ARISTO
Made in Germany

Our high-quality drawing boards impress with well-thought-out details and superior workmanship. The board's body is made of impact-resistant, non-reflective plastic, which ensures durability and comfortable working even with intensive use. Non-slip pads on the bottom of the board guarantee a firm hold on any work surface.

The magnetic clamping rail with integrated viewing window allows precise control of the sheet stop, while the compass scale facilitates quick and precise adjustment of radii.

The drawing rail with 2-point guide runs smoothly and securely – supported by the ergonomically shaped handle with innovative "stop-and-go" mechanism and free-wheel clutch for smooth movements and precise line guidance.

Guiderails on the drawing rail enable the precise attachment of accessories such as a drawing head, angle drawing tool, or quick-drawing triangle. The quick-drawing triangle included allows for precise measuring and drawing in one step – ideal for school, university, or technical drawing at work.

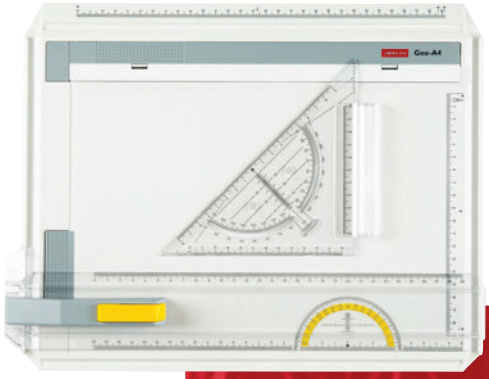

Geo-Board Drawing Board

- Drawing board made of solid and non-reflecting plastic
- Antislip protection on the lower side
- Magnetic clamping rail with window for controlling the paper margin
- Compass plotting scale for picking off radii quickly
- Straight edge with 2-point guidance
- Ergonomic grip with stop-and-go and free-running mechanism
- Guidance bars on the straight edge for precise use of accessories such as drawing head and rapid set square
- Rapid set square for measuring and drawing
- Product quality “Made in Germany“
- Corresponds to ÖNORM A2133
- Drawing board comes with straight edge and rapid set square in a solid cardboard box

General Description of our **ARISTO Compasses**

- **Rapid adjustment compass** - Compass with spindle and middle-wheel adjustment. Available without hinge, with one or two hinges.
  - **Rapid adjustment compass without push-button** - Compass with fast- moving spindle. Depending on the model, readjustment of the movement is mostly possible.
  - **Rapid adjustment compass with push-button** - Compass with smooth spindle. You can activate the rapid adjustment with the push-buttons, afterwards carrying out the fine adjustment by means of the middle-wheel. This ensures that the adjusted measurement will not change when you put the compass aside. Available without hinge, with one or two hinges.
- **General-purpose compass** - Compass without spindle and middle-wheel adjustment. Available without hinge, with one or two hinges
- **Small bow compass** - Compass with smooth spindle. The adjustment of the measurement can only be carried out with the middle-wheel. Available without hinge, with one or two hinges.
- **Beam compass** - Special compass for drawing very big circles (up to 1280mm Ø).

Small College Compass

- Legs made of zinc die-cast,
- Max. Durchmesser des Zeichenkreises: 240 mm
- The compass comes in a transparent case

The new ARISTO ink pen - **MG1 PRO**

Made in Austria

The new ARISTO MG1 PRO ink pen is available in 16-line widths and features a drawing tip made of high-quality polished stainless steel. It impresses with its outstanding ISO-standardized precision, reliability, and functionality.

It can be used on a variety of surfaces such as drawing paper, transparent paper, or drawing paper. The new and longer shaft ensures comfortable handling for both creative and technical drawing applications.

MG1 PRO ink pens offer fast, drip-free writing, even ink flow, and a revolutionary refill system without cartridge replacement and without ink loss.

In addition, the cap can be quickly opened with just one hand thanks to its innovative click closure. The double seal in the cap provides a hermetic seal and prevents the ink pen from drying out. The transparent barrel allows you to check the ink level at any time.

Flexible Curves

The ruler is perfectly suitable for drawing curves. It has a vinyl coated lead core to fix the curve and is equipped with an ink edge.

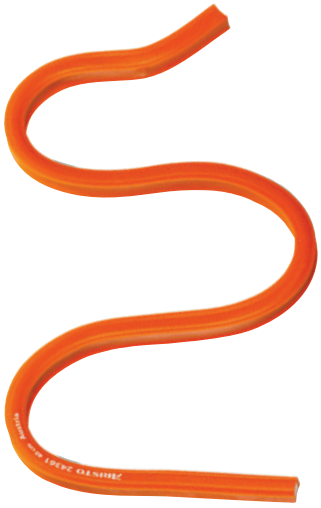

The outer material of the flexible curves from ARISTO is vinyl which does neither discolour nor dissolve, thus guaranteeing a long life. By means of the four-sided lead core the ruler can be adapted to nearly every curve, fixing the selected curves and maintaining them when taking off the ruler. It is also suitable for displaying curves of a three-dimensional object.

Additionally, the outer material has elevated edges for perfect drawing with different pens, thus preventing smudging of ink or Indian ink lines. Flexible curves are very much suitable for patterns in the tailoring as well as for many other applications.

- Perfect for drawing curves
- Vinyl coated lead core for perfect fixing
- With ink edge

CUT-MAT Cutting and Working Pad

ARISTO CUT-MAT is an indispensable tool for all who want to make precise and traceless cuttings. It protects the table as well as the cutting knife.

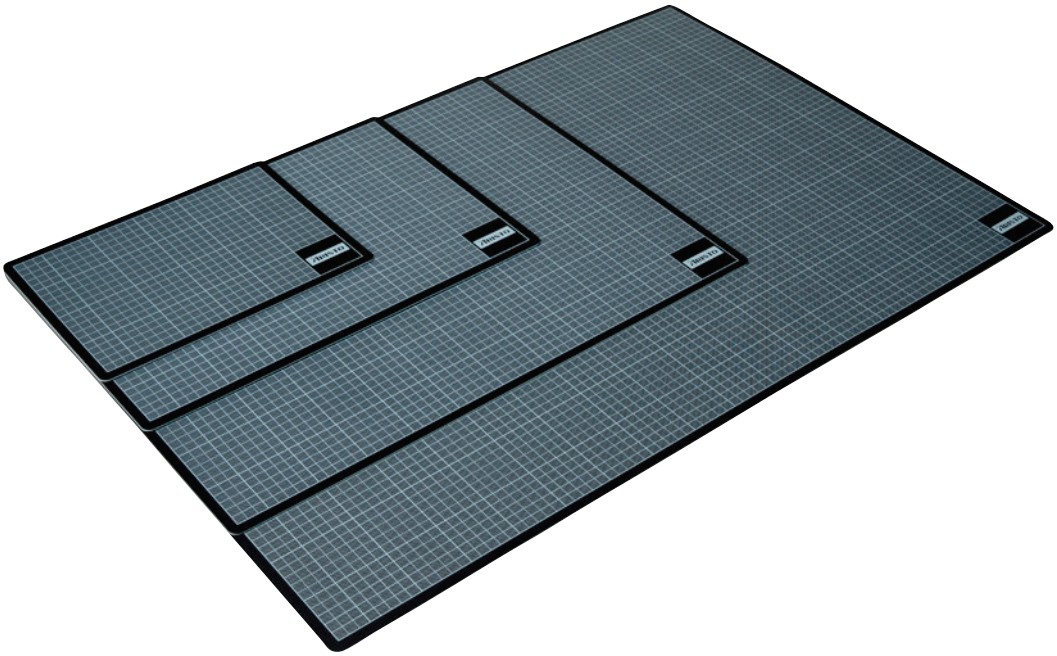

The surface is „self-healing“ which means it closes after cutting. Depending on the lighting conditions you can either use the green or black surface.

The white mm-grid printed on both sides, the skid resistance and the 3-layer „sandwich-soft“ build-up with solid interior, underline the perfect quality of this 3mm strong indestructable cutting pad..

- 3mm strong cutting and working pad A4
- Protects the table surface
- „Self-healing“ material
- 3- layer „sandwich-soft“ build-up
